PROFILE

As an economist and researcher, I aim to contribute to improving public policy and people's lives in Czechia, Europe and globally, with research at the intersection of public finance, international and development economics. In my research, I study how firms' interactions with public policies – above all the taxation of multinational corporations – affect public revenues and living standards. I founded and lead the Centre for Public Finance at Charles University and have won competitive grants of over EUR 4 million as principal investigator.

RESEARCH INTERESTS

Corporate taxation, global minimum tax, tax havens, corporate tax avoidance, effective tax rates and investment of multinationals, illicit financial flows, and income inequality.

SELECTED RECENT PUBLICATIONS

1. Fiscal consequences of corporate tax avoidance (with Katarzyna Bilicka and Evgeniya Dubinina). *Journal of Public Economics* 257: 105613, 2026.
2. Did the Tax Cuts and Jobs Act reduce profit shifting by US multinational companies? (with Javier Garcia-Bernardo and Gabriel Zucman). *IMF Economic Review*, forthcoming.
